Chief complaint

1yr sfu dx osa (sc)

HPI

HPI Narrative

From 07/08/2025 sleep follow-up Annual sleep check and concerns about lung infection and oxygen levels.

History of Present Illness (HPI): The patient, Richard, presents for his annual sleep check. He uses an AirCurve V Auto BiPAP machine with nearly 100% usage. He reports issues with mucus and coughing when lying flat, requiring him to sit up. He has been informed that his lung infection is not resolving despite treatment with three to four strong antibiotics, and he has been given a prognosis of three to five years, possibly less. The focus is on containing the infection rather than eliminating it. He has concerns about the effectiveness of an overnight oxygen test due to a battery issue.

Review of Systems (ROS):

- Reports mucus and coughing when lying flat
- Experiences sleepiness despite BiPAP use
- Uses albuterol nebulizer in the evening, followed by saline

Medications: Uses albuterol nebulizer in the evening.

NOTES BELOW ARE FROM PREVIOUS VISITS AND WERE REVIEWED TODAY FOR CLINICAL CONTINUITY PURPOSES

The patient is a 79-year-old white male who I last saw here in the office on 05/05/2025 for followup for pulmonary mycobacterial infection due to MAI in the setting of chronic bronchiectasis. The patient has continued to follow the MAI treatment regimen outlined by the Mayo Clinic with azithromycin, ethambutol, clofazimine, and Arikayce inhalations. He has remained stable since we last saw him. He reports excellent medication compliance. He did have a fairly recent fall, and he is scheduled to have a CT scan of the head later today just to make sure that there is no evidence of any subdural hematoma. He denies fever, chills, or night sweats. He does have chronic cough and dyspnea, but it is not significantly changed. We did review labs that were drawn on 06/03/2025 that showed a hemoglobin of 14.6, white blood cell count of 4.5, and a platelet count of 243,000. Sodium was 140, potassium 4.8, BUN 21, creatinine 1 and glucose was 101. Calcium was 9.2, albumin 4.1, and liver function tests were all otherwise normal.

Past Medical History

- Infection caused by Mycobacterium avium complex , pulmonary infection

MRN: C#-139790

Printed 10 Jul 2025

Signed (Final) Singh, Abhinav on 07-08-2025 01:35pm

- Chronic respiratory failure with hypoxia , NOSS with no O2 need aug 2022. off o2; improved.
- Multiple nodules of lung , Right LL dominant mass; scattered subcm nodules; bronch and navigation biopsy july 2021 was neg for malignancy. BAL growing Nocardia / MAI; nodule FNA also growing MAI -- treated for nocardia initially; recurrent worsening symptoms and now post bronch 1/27/22 - all cultures growing AFB at this time. also isolated Cryptococcus - treated, now on just MAI treatment.
- ILD - Interstitial lung disease , UIP pattern
- Pulmonary fibrosis, unspecified , not on antifibrotics at this time
- Bronchiectasis, uncomplicated , CT reviewed from April 2023
- Upper respiratory infection
- Abnormal laboratory findings
- Cognitive decline
- Hyperlipidemia
- Sleep apnea , stable on treatment

Past procedures

- Colonoscopy 08-25-2020
- Dental exam 6 month schedule
- Eye exam 2-2001

Presenting medications

- albuterol sulfate 2.5 mg/3 mL (0.083 %) solution for nebulization twice a day
- amikacin 590mg/8.4ml nebulization 1 every day
- azithromycin 500 mg tablet 1 by mouth every day
- bupropion HCl SR 150 mg tablet, 12 hr sustained-release 2 by mouth @ 1:30 p.m. and 1 by mouth @ 5:30 p.m.
- clobazimine 100 mg capsule 1 every day
- Creon 36,000 unit-114,000 unit-180,000 unit capsule, delayed release 2 by mouth before breakfast/lunch/dinner and 2 by mouth before snack MAX 10 DAILY
- ethambutol 400 mg tablet 1 by mouth 3 times a day
- Gas-X 80 mg chewable tablet as needed
- lamotrigine 200 mg tablet 1 every morning; Managed by: PSYCH
- melatonin 5 mg tablet 1 tablet every bedtime
- multivitamin oral every day
- pantoprazole 20 mg tablet, delayed release 1 by mouth every day
- Probiotic
- quetiapine ER 150 mg tablet, extended release 24 hr 1 by mouth at bedtime
- quetiapine 50 mg tablet 1 by mouth every bedtime
- sodium chloride 3 % for nebulization 1 twice a day
- Vitamin C 500 mg tablet 1 tablet every day
- zinc gluconate 20 mg tablet 1 tablet every day
- Zyrtec 1 mg/mL oral solution 2.5mL by mouth twice a day

Allergies / Intolerances

- Bactrim DS
- Sudafed

Laboratory & Diagnostic Results:

- Overnight oxygen test on 05/15/2025 showed an average oxygen saturation of 94% on BiPAP and room air and a majority of time spent above 90% no supplemental oxygen required

IMPRESSION:

1. OSA: WITH INITIAL CPAP INTOLERANCE and now tolerating bi-level well. Discussed above.

1.1 DISCUSSED NOSS TEST--no supplemental O2 at night required

1.1 HYPERSOMNOLENCE NON restorative sleep-medication for other medical comorbidities verses relative sleep deprivation-asked him to expand--now at goal

2. OBESITY. Now resolved to a normal BMI. He was congratulated

3. Device was obsolete, > 16000 hours.

Has a new machine bilevel PAP since March 2025 using it well

4. ARM AND LEG BODY JERKING AND RESTLESS SLEEP. Stable no worsening reported

Discussed strategies. Lowering quetiapine as possible

Avoiding clock watching and improving sleep hygiene

5. Insomnia. No specific medicines at this time behavioral therapies working

6. COMPLICATED PULMONARY MAI INFECTION. Working with pulmonology Infectious Disease. Not interfering with PAP usage at this time.---- MAI being treated with Pulmonary as well as Mayo Clinic regimen

6.1 HYPOXEMIC RESPIRATORY FAILURE multifactorial. NOSS test not revealing need for supplemental O2 at night

Only using supplemental O2 with exertion

6.2 ALLERGIES CONGESTION consider Singulair addition to Zyrtec per primary care

Fibrotic crackles noted chronic
