Patient Demographics			
Patient Name	Kathryn Smith	DOB	8/10/1983
Study Date	07/21/2025	Study Type	Diagnostic
Sex	F	Height	69 Inches
Age	41	Weight	263 Pounds
Referring Physician	Patel, Dharmesh MD	BMI	38.84
Scoring Technician	Megan Pickens, RPSGT	Study ID	4219273984

Study Details
The following parameters were recorded using a Zmachine Synergy (General Sleep Corporation): EEG for sleep staging & arousals; respiratory inductance plethysmography for thoracic respiratory effort; pressure transducer for respiratory airflow & snore; pulse oximeter for SpO ₂ , pulse, & optical plethysmograph; and tri-axis accelerometer for body position. Hypopneas were scored per AASM recommended definition of 4% desaturation.

Times and Durations	
Lights Off	07/21/2025 21:41:51
Lights On	07/22/2025 06:00:26
Total Recording Time (TRT)	498.6 min.
Time in Bed (TIB)	477.0 min. (95.7% of TRT), 7 hours 57 minutes
Total Sleep Time (TST)	428.3 min. (89.8% of TIB)
Sleep Efficiency (SE)	89.8 % of TIB
Apnea Hypopnea Index (AHI)	25.1 (#/hr)
Respiratory Disturbance Index (RDI)	25.5 (#/hr)
Respiratory Event Index (REI)	23.4 (#/hr)
SpO ₂ < 89% (cumulative time)	13.6 min.
SpO ₂ < 89% (longest span)	1.3 min.
Snoring	44.8 min. (10.5%) of TST

TRT is the total duration of the recording; TIB is the elapsed time from lights off to lights on; TST is the cumulative time scored as any stage of sleep; SE is $100 \times (TST \div TIB)$ expressed as a percentage; AHI is apneas + hypopneas per hour of TST; RDI is apneas + hypopneas + RERAs per hour of TST; and REI is apneas + hypopneas + RERAs per hour of TIB.

Home Sleep Analysis Report

Patient Name	Kathryn Smith	Study ID	4219273984
DOB	8/10/1983	Sex	F
Study Date	07/21/2025		
Interp. Physician	Dr. Kary Whitehead	Interp. Date	2025-07-29

Kathryn Smith underwent a home sleep diagnostic study on 07/21/2025 investigating the possibility of obstructive sleep apnea. The study was conducted utilizing the Zmachine Synergy device. Raw data from the Synergy study was reviewed for diagnosis and recommendation.

Summary of Findings

Date	Recording Time	Sleep Time	AHI	ODI	Mean SpO ₂	Lowest SpO ₂	Mean Heart Rate
07/21/2025	498.6 min.	428.3 min.	25.1/hr	26.6/hr	92.9%	78%	59.2 bpm

AHI = Apneas + Hypopneas per hour of sleep. All apneas and hypopneas are at least 10 seconds in duration, and hypopneas are scored with a minimum 4% associated desaturation. ODI = Oxygen desaturations of at least 4% from baseline per hour of sleep.

- Positional component noted with an increased AHI while in the supine position.
- Significant oxygen desaturation observed with a total of 13.6 minutes below 89%.
- SpO₂ longest span <89% was 1.3 minutes.
- Tachy-brady not Noted.

Diagnosis

Moderate Obstructive Sleep Apnea (G47.33)

Recommendations

CPAP Auto-Titration from 5cm-20cm with sleep clinic follow up.

Kary G. Whitehead, MD, ABSM
